

Easy Grader

User Guide | QuickerGrade

What it does

The Easy Grader scores any paper in seconds. Enter the total questions and how many were missed, and it shows the percentage score plus the letter grade - perfect for teachers grading tests, quizzes, and homework. Free, no signup, runs entirely in your browser.

How to use it

- **1. Enter Questions.** Type the total number of questions on the paper.
- **2. Enter Wrong.** Type how many the student missed (0 for a perfect paper).
- **3. Read the result.** The percentage score and letter grade update live as you type.
- **4. Chart and print.** Use the grade chart and print options for paper records.

Formula

$$\text{Grade} = (\text{Questions} - \text{Wrong}) / \text{Questions} \times 100$$

Worked example

20 questions, 3 wrong.

$$\text{Grade} = (20 - 3) / 20 \times 100 = 17 / 20 \times 100 = 85\% \rightarrow \text{Grade B.}$$

Tips

- **Wrong can never top Questions.** If it does, the entry is flagged - fix it and the score resumes.
- **Perfect paper.** Enter 0 wrong for a clean 100%.
- **Decimals.** Toggle the decimals option when you want extra precision.
- **Private.** Nothing is uploaded or saved - everything runs in your browser.
