

GPA Calculator

User Guide | QuickerGrade

What it does

The GPA Calculator turns your courses into one GPA number. Enter each course's letter grade and credit hours - it shows your GPA on the standard 4.0 scale. Free, no signup, runs entirely in your browser.

How to use it

- **1. Add a course.** Type the course name (optional, just for your reference).
- **2. Pick the Grade.** Choose the letter grade you earned: A, B, C, D, or F.
- **3. Enter Credits.** Type the credit hours the course is worth.
- **4. Read your GPA.** Your GPA updates live as you type. Add rows for every course.

Formula

$$\text{GPA} = (\text{Grade Points} \times \text{Credits} + \dots) / \text{Total Credits} \quad (\text{A}=4, \text{B}=3, \text{C}=2, \text{D}=1, \text{F}=0)$$

Worked example

English A (3 credits), Math B (4 credits), History A (3 credits).

$$\text{GPA} = (4 \times 3 + 3 \times 4 + 4 \times 3) / 10 = (12 + 12 + 12) / 10 = 36 / 10 = 3.60.$$

Tips

- **Credits matter.** A 4-credit A moves your GPA more than a 1-credit A.
- **Standard 4.0 scale.** A=4, B=3, C=2, D=1, F=0. Plus/minus grades use the same base points.
- **What-if planning.** Add a future course with the grade you aim for to preview your GPA.
- **Private.** Nothing is uploaded or saved - everything runs in your browser.
