

GPA Scale

User Guide | QuickerGrade

What it does

The GPA Scale page converts your GPA between every common scale. Enter your GPA, pick the scale it is on, and see it instantly on the 4.0, 4.5, and 5.0 scales plus percentage and letter grade - with the full conversion chart. Free, no signup, runs entirely in your browser.

How to use it

- **1. Enter your GPA.** Type the GPA number you want to convert.
- **2. Pick its scale.** Choose whether it is on the 4.0, 4.5, or 5.0 scale.
- **3. Read every scale.** Your GPA appears on all scales plus percentage and letter grade.
- **4. Use the chart.** Scroll the conversion chart for any letter-to-GPA lookup.

Formula

5.0 scale = 4.0 scale + 1.0 · 4.5 scale = 4.0 scale + 0.5

Worked example

A 3.50 on the 4.0 scale converts to 4.50 on the 5.0 scale
and about 87-89%, roughly a B+.

Tips

- **Know your school's scale first.** Converting from the wrong scale gives the wrong answer.
- **Percentages are ranges.** A GPA maps to a percentage band, not one exact percent.
- **Useful for applications.** Colleges often ask for GPA on a specific scale - convert before you apply.
- **Private.** Nothing is uploaded or saved - everything runs in your browser.
